

Capacitation & Trainings

Benefits

- Courses for drinking water and wastewater treatment.
- Training on specific treatment processes.
- Training on process control programs and its implementation.
- Hands On field training.
- Shadow staffing training.
- Start Up process.

Not properly trained personnel can be the biggest problem for the operation of your treatment system. ETAG Corporation has 28 years of service, demonstrating the quality that characterizes us in every training we offer. We have trained several hundreds of treatment system operators, sharing experience in the operation of industrial, public and private treatment systems. For more information about our Capacitation & Trainings services, you can visit our company [success stories](#) or [request more information](#) about this service.
